

## ABOUT ME

My career goal is to pursue Technology, and arts. with the outbursts of new technological advancements coming forth, I would like to be involved in it. The job I would like to pursue is Digital Designing, It is something that requires creative art design. Drawing and creating art is a passion of mine, and if I can do it while being involved in technology, it would be even better. My plans for achieving my goal is to hone my art skills digitally. I want to practice at most 5 days a week, designing what I like and improving my skills. I chose this career because I love designing, it puts my creativity to the test, and I like using the creative side of my brain to create new things. I find creating art fun, so It would be nice to have a job that is involved in the technology world, and is also enjoyable to do.

Digital Design requires a lot of creativity and discipline. Everytime I design something, for example a poster, some art, and graphics, I always persevere until the very end. I use my artistic skills and creativity to come up with a professional result. Thinking of something unique is usually not too hard for me. When it comes to anything other than designing, like homework or extracurriculars, I tend to self motivate myself to complete the task as effectively as possible. I have participated in many activities. I used to play baseball, basketball, football, soccer, chess, hockey, and volleyball consistently a while ago. The most amount of dedication I put into was basketball. I have played basketball for over 6 years, and have participated in many basketball games.

When I step out of my comfort zone, I discover new things about my character. Facing challenges, such as a demanding math course, initially reveals my relaxed nature and the need for a spark of motivation. Once ignited by the goal of achieving a good grade, my dedication and perseverance come forth. I realize that having a clear objective is the key to having my full potential and doing my best.

In the future, I would like to pursue a career that I really enjoy. This is currently the career I'm thinking about pursuing, but it might change overtime. I appreciate you for taking the time out of your day to read this, you can explore the rest of my site if you want.
